JUDICIUM ASTROLOGIUM PRO ANNO, 1796;

OR,

AN ASTROLOGICAL JUDGEMENT

FOR THE YEAR 1796.

Stern WINTER's come ; where'er we rove,
What dreary prospects round us rise ?
The naked hill, the leafless grove,
The hoary ground, the frowning skies !
Yet all that fades, again shall live,
For nature dies but to revive.
So when the wint'ry storms of TIME are past,
Eternal spring shall circle ALL at last.

FIRST : OF THE WINTER QUARTER, 1795.

WHICH begins Monday, 21st December, 1795, 7h. 15 P. M. at that time 20 deg. of Aries is on the mid-heaven, 10 deg. the royal sign Leo ascends, 27 deg. thereof, being on the cusp of the second house. Surely German rapacity is not to cozen us out of more money ! and yet either they, or some acquaintance, national servants, or pretended friends, acquire at this time the disposal of an immense quantity of the public treasure. The Sun is near the cusp of the sixth, just separating from the sextile of Mars, who is in the fourth, in 28deg. 40 min. of Libra ; the Moon is angular in the tenth, and from 1 deg. 30 min. of Taurus, she is separating from the opposition of Mars and trine of the Sun, and applying to the quartile of Jupiter and the trine of Venus, located in 16 deg. 33 min. of Capricorn in the sixth. Mercury is in Sagitary, void of course ;—much negotiation to little purpose till the next month. Jupiter is in 8 deg. 30 min. of Aquarius, in the cusp of the seventh house, where he is beheld for the third time this year, with a salubrious trine by Saturn, who is retrograde in 8 deg. 39 m. in Gemini ; which sign is intercepted in the eleventh house. This figure exhibits a considerable military force, about to embark in a few days from Jamaica ; where the people are sickly and in a state of trepidation. Frankfort, and the island of Mauritius is now liable to the intrusion of military men. In Europe our allies the Vendéans, and even Chouans, (the refuse and the scourge of human kind) will be disposed to end their predatory war ; and from this scheme of the heavens we may be assured that the emperor, or at least another of our allies is treating for peace. Nevertheless, many parts of this tragical year will be remarkable for the prevalence

prevalence of illiberal prejudices, and inveterate animosities, and inconstant, irregular, and inclement skies.

The significators of kingdoms and countries in friendly aspect of each other, denote the union of their councils and forces; therefore we have seen, viz. the 4th of May last, Saturn and Mars conjoined in the first degree of Gemini, the Emperor of Germany condescend to accept, by the envoy we sent from our court, near five millions sterling of England, for which he engaged to prosecute the war with increasing vigour, although the pacific tendency of the trines of the superiors, which happened in February and June last, has made all, or almost all, the German states clamorous for a cessation of hostilities, during the greater part of the year. The King of Prussia, baffled and discomfited by the republicans of France, alarmed by the discontents of his subjects, and under no small degree of apprehension of the machinelian designs of an imperious neighbour, a fiend in petticoats, recognized the French republic, and concluded a treaty of amity and peace. Spain labouring under a series of grievous disappointments and irretrievable defeats, which were plainly indicated to us by the debilitated condition of the planet Jupiter, on the 22d of July, one month after the last trine of Saturn and Jupiter followed the example of Prussia; but, to preserve its European possessions, that despot was constrained to cede to the victorious republicans his very valuable territories of St. Domingo, instead (as was stipulated by the coalition of kings at Pilnitz) of being put into possession of the whole of that extensive island! Hence we are of opinion, that, although the retrogradation of Saturn may prevent the blessings of peace being restored to all the belligerent powers, yet his friendly aspect to Jupiter, and both of them now located in humanesigns, assure us that pacific negotiations will be carried on to good effect. In regard to the Germanic powers, *"fearfulness and trembling are come upon them, and horror hath overwhelmed them."* While by the acceptance of the French people, of the republican constitution, "we behold a new order of people about to arise in Europe, which shall give laws to law-givers, discharges to priests, and lessons to Princes." Mercury having lately passed the opposition of Saturn, impresses on the mind some idea of a dissolution of the British parliament.

The moon separating from the opposition of Mars, and beholding Jupiter with an unfriendly square, imports a spirit of discontent, of mutiny and insurrection in various parts of the world. Mars is hastening into Scorpio, located in that sign Ptolomy says, that planet denotes a people "bold, evil, treacherous & laborious;" the Dutch, the Genoese, and

Venetian republics, but more especially SPAIN, are menaced with being unwillingly involved in new troubles and controversies: that nation has now cogent reasons to guard against the crafty designs of some incendiary statesmen; because Mars, after having afflicted Jupiter with an hateful square, enters the ascendant of Spain in the month of February, and the 28th day of that month he encounters Saturn with an opposition in 7 deg. of Gemini; both the infortunes will at that time be posited near fixed stars, of a violent nature, and of the first magnitude. The Sun (from Pisces, the ascendant of Portugal, Galitia, Normandy, Bohemia, and Sicily,) at that time beholding the celestial combatants, by a quartile aspect, augments the danger, stirring up conspiracies, and presages the burning of barns, storehouses, theatres, palaces, the sinking of ships, the fall of high buildings, mortal accidents by restive or enraged animals, and other superlative troubles. The 29th of June Mars being retrograde in 20 deg. of Sagitary, another opposition occurs, which will be reiterated in 26 deg. of the same signs; the 28th of August, when both those planets will be direct in motion. As great events have the superior planets for their significators, we contemplate with consternation and horror the probable effects of these infuriating rencounters of the celestial bodies. The leaders in those conflicts, which are thus prefigured to the intelligent astrologer, will not have it in their power to detail the result of their labours in the laconic manner of *Cæsar*—"Veni! vidi! Vici! — *I came! saw! and conquered!*" Under the influence of Saturn and Gemini are India, Greece, Saxony, Brandenburg, Sweden, Russia, Piedmont, Flanders, Brabant, Mentz, part of North America, Lower Egypt, Arabia, BARBADOES, ST. DOMINGO, St. Christopher's, and other islands in its vicinity; Turkey, Sardinia, the islands in the Mediterranean, the west and south-west of England, Cities of London, Bremen, Hamburgh, Oxford, and Charles Town. Under Mars and Sagitary are ENGLAND, FRANCE, SPAIN, SILESIA, DENMARK, Syria, Burgundy, Naples, part of Italy, Marfeilles, Toulon, DALMATIA, HUNGARY, BRITANY, Dublin, and Mexico.

Many of these regions and cities will be obnoxious to the calamitous effects of those malific configurations of the malevolent planets, which may be expected to be followed by an unwholesome air, by scarcity of such cattle as are useful to mankind, by tedious contentions, political distractions, pestilential effluvia, contagious diseases, subterranean commotions, volcanic explosions. The City of London, which is the "queen among the nations," and under

under the guidance of good principles, opposed the American war, has, by patronizing the present war, similar both in its principles and progress, enabled ministers to diffuse innumerable miseries among mankind; alas! we fear that our metropolitan city will have cause to cry "*Woe is me for my hurt—my wound is very grievous.*" Happy at all times, but particularly in times so pregnant with calamity, is the man, who lives and acts as under the all-seeing eye of the beneficent father of all, amidst all the moral distractions, the war of elements, and the crush of states, by which for the moment he may be appalled, he may say with humble but unshaken confidence "*Thou O Lord art the true God; thou art the living God, and an everlasting king: at thy wrath the earth shall tremble, and the nations shall not be able to abide thine indignation; but the eye of the Lord is upon them that fear him, to deliver their soul from death, and to keep them alive in famine. Be merciful unto me, O God, be merciful unto me; my soul trusteth in thee, and in the shadow of thy wings will I make my refuge, until these calamities be past.*"

WEATHER, &c. THIS QUARTER.

January,—The beginning of the month we shall have expresses bring news of a pacific nature—frosty air, with snow or sleet. The 9th of January, 18h. 5m. P. M. the Sun will be eclipsed, invisible to us; but in the southern regions, viz. in 88 deg. 45 min. east lon. and lat. 21 south, the Sun will be centrically eclipsed on the meridian.—11th, 12th, 16th, 18th, more temperate, with rain or sleet; now the Spanish Monarchy will be sensible of the hostile designs of a crafty statesman:—about this time we fear land floods.

Now from their rifted chafms the billows rise,
And foaming burst tumultuous to the skies;
Then roaring dreadful o'er the delug'd plain,
Sweep herds and hinds in thunder to the main.

Twenty-third to the end, cold turbulent winds, rain or snow;—important losses at sea, both the latter end of this and the ensuing month. *February* 5th, much wet; 8th more warm but followed by winds and variable weather—Batalia, Ireland, and Poland are in a state of discontent;—24th, 26th, 29th, snow, hail, or rain, with high winds, and thundering at least in or concerning the senate; the priestly impostor, who is stiled by our Vice-Roy of Corsica "*HIS HOLINESS*," or some grandee of Portugal, Sicily, Galitia, or Spain, is menaced by the frowns of misfortune; and some royal

Nimrod, or illustrious butcher, "*privileged to kill*," in danger of a fall. As lent commences so early, we may expect that our religious statesmen will dispense with calling upon us to "sanctify a fast," although it is too true that they have done "*the things which they ought not to have done*." *March*, the beginning of this month expect frequent rains, accompanied with fleet or storms—some knavish mercurialist now finishes his career; in the West Indies the African tribes are in a state of activity; in Europe the Germans are in motion. 12th, to 18th, more moderate weather.

OF THE SPRING QUARTER.

The WINTER's past, the tempests fly,
Soft gales breath gently thro' the sky;
The lark, sweet warbler! on the wing,
Salutes the gay return of SPRING;

Which takes its beginning in our meridian Saturday, March 19, 8h. 42min. P. M. at that time 28 deg. of Libra ascend, and 8 deg. of Leo, are on the mid heaven. Venus, lady of the ascendant is strong in 6 deg. of Taurus, 26 deg. of that sign being upon the cusp of the 8th house. The Sun, lord of the angle of honour, is cadent near the cusp of the sixth, applying to the sextile of Saturn who is located in 8 deg. of Gemini, (the sign intercepted in the 8th house) and to the trine of Mars in 10 deg. of Sagittarius, in the second house. The moon is angular in 14 deg. 40 min. of Leo, in the tenth house, from whence she is applying to the trine of Mars, and the opposition of Jupiter, 19 deg. of Virgo, is upon the cusp of the eleventh. The planet Herschel is retrograde in 13 deg. of that sign, and Mercury his dispositor is in 4 deg. 30 min. of Pisces, applying to a sextile of Venus, the opposition of Herschel, and a quartile of the two Infortunes. Jupiter is in the fourth house swift in motion, in 29 deg. of Aquarius: the 23d day of this month he enters Pisces, his domal dignities where till the latter end of June, when he becomes retrograde, he will be within orbs of a quartile of Saturn, and an opposition of the planet Herschel. By these positions and aspects of the celestial wanderers, we perceive that the affairs of Europe, and of the colonial dependencies of many European powers, continue to be in a deranged and perturbed condition. From this scheme of the heavens we also see that a quantity of the public property, to an UNEXAMPLED

AMOUNT

AMOUNT is called for : we may also fear and expect that the high price of many of the necessities of life is yet a source of discontent. The bounties of Providence having been exhausted in supplying immense hordes of hirelings * ; men continue to be feelingly reminded of the old adage, *wilful waste makes woeful want*.

A king, prince, or potentate, quarrels with his consort, is estranged from his former acquaintances, or goes to war with his former associates ; nevertheless embassies, leagues, treaties, and negotiations seem to be more attended to at this time, than the operations of war. A sovereign who is well effected to the Pope will be grievously chagrined by sickness or disappointment.

“ Dull though the beam our astronomic eye ;
Beholds a tempest in the distant sky ;
Dull though our ken, yet hark ! th’ attentive ear
Catches a thunder growl from yonder sphere ;
She sees sharp fate amid the gathering gloom,
A cloud of vengeance black with mortal doom.
But dares not name the *melancholy* form,
Whom FATE has marked the victim of the storm.”

Many contentions will happen concerning religion and the clergy, or about what is more interesting to the Hierarchy, the *revenues of the church* ; and it appears to us, that notwithstanding the late treaty, in which the rights of a neutral and independant state to a free navigation of the seas, are strangely sacrificed, that some squabbling will happen between this country and North America, and the emperor of Germany and the British ministry will have jarrings on account of former reckonings, or about the beginning of a new score.

The sign Aries has for ages been understood to be England’s ascendant, that sign is here located on the cusp of the sixth and seventh houses. — “The ascendant of any place,” says the laborious Salmon, “upon the cusp of the sixth, shews great sickness to the people, and if it be upon the cusp of the seventh, it shews wars, contentions, and broils, and that the adversary will have the better.” We are inclined to think that the celestial twins share in some degree with the Ram, as Gubernator of Britain ; but that conjecture will not afford us much consolation, because Gemini, with Saturn located therein, is in the eighth house ; and the same

* Twelve vessels laden with live stock have recently sailed, in one day, from Cork, for the fleet on the coast of France, for the supply of insurgents, &c.

author says, "The ascendant of any place located on the cusp of the 8th, presages malignant fevers, plague, pestilence, and great mortality among mankind there." And it is worthy of observation that when in the year 1766, the planet Saturn was last in Gemini, the king, in a speech from the throne, the 11th of November, informed both houses of parliament, that the high price of grain had determined him to call them so early together, and that a spirit of the most daring insurrection had manifested itself in divers parts of the kingdom.

Those philosophers and patriots who interest themselves in the cause in which the French people are engaged, will yet have reason to mourn over their crimes, and their misfortunes. Accusations, proscriptions, and executions, will be too frequent till after the effects of the great Solar eclipse of September, 1793, which will last at least three years, and until the influence of three oppositions of the malices, which happen this year, pass away. The effects of those oppositions will not only be conspicuously seen in mundane affairs, but may be expected to be felt in a peculiar degree by those persons who at the time of birth, had either the signs Gemini or Sagitary ascending, or who had either Jupiter, the Sun, Moon, or Mercury posited in the degrees of either of those signs in which the oppositions of Saturn and Mars are reiterated.

WEATHER, &c. THIS QUARTER.

March 26.—Cold rain, blustering gales, and unfortunate navigations. *April 9 to 13,* warm rain, some engagements or losses at sea, which seem more immediately to effect France, Spain, Portugal, and the Italians. Many fierce debates, and warmer rain may be expected. Fifteenth to the end agreeable weather for the season, with many arrivals, of shipping, and various intelligence at the English ports.

May;

"For thee, sweet Month the groves green liv'ry wear,
If not the first, the fairest of the year;"

While Venus breathes through all the tuneful grove,
All the sweet madness of excessive love.

The 2d of this month is the birth day of a woman, or rather of an Imperial female fury, who murdered her husband, and has despoiled a kingdom. Hecatombs of human beings have been sacrificed to her lust of dominion; where is the eye that would be suffused with a tear,

—If

—If soon her bloated carcase feel
The keen deep-searchings of a patriot's steel?

May 5, 8, frequent showers: some fly mercurialist suffers by the halter or guillotine; the affairs of Ireland now attract attention. The 8th of this month, in the year 1759, is memorable for being the birth day of the RIGHT HONOURABLE WILLIAM PITT, CITIZEN and PEPPERER*: the peppering or escharotic operations of his measures will be felt for ages by the nations, and have procured him an address to the following effect, from one of the most popular poets in the kingdom.

O Pitt! great master of the *ways and means*,
To slake the golden thirst of kings and queens;
To gorge the cavern of each greedy chest,
With all the wonders of the bleeding east;
To lull with opiate draughts, a kingdom's groans,
Patch ragged crowns, and cobble crazy thrones:—
Sick of thy taxes, while the wearied nation,
Drags her last penny forth, and fears starvation.—
To thee, responsible for ev'ry blunder,
Her mildest murmurs should be claps of thunder.—
And shouldst thou *tumble down* the rock of fate,
No seas of tears shall wail thy shortened date.

15, 18, 20, wholesome gales with fertilizing showers, and some national treaty manufacturing this month, yet the inflammatory effects of the opposition of Saturn and Mars opposing each other with their malignant rays, are now become apparent in raising storms, even among peaceful nations. 29, showers with lightning. Both this and the following month there will be danger of accidents by fire.

June 1, 7, 8, thunder showers. 15, 16, vehement heat with destructive lightning or thunder showers. This month will, we think, be again memorable for a naval engagement.

OF THE SUMMER QUARTER.

It commences June 20, 6h, 36m. P. M. when 10 deg. of Libra culminates, and 10 deg. of Sagitarius ascends, with Mars in 23 deg. retrograde therein. Jupiter is in the third

* *The antient title of the Grocer's company, a company famous in the annals of Toryism; and who sagaciously adopted him as a Brother.*

house,

house, in 12 deg. 58 min. of Pisces's domal dignities. Saturn is in the western angle in 18 deg. 48 min. of Gemini. Venus is in 12 deg. 50 min of Leo, the sign which is now intercepted in the eighth house, from whence she throws her friendly, but, we fear, ineffectual sextile to Saturn, and trine to Mars, who are advancing with unappeasable rancour to an opposition from angles; while the Moon located in 4 deg. of Capricorn, has just separated from an angular opposition of the Sun, applies to the Sextile of Jupiter in the third, and to the oppositions of Mercury on the cusp of the eighth house. Surely the political juggler of the day has said *Presto, begone!* for "the shining bauble is taken away, and the doors are locked up." This scheme of the heavens indicates that parliament has been dissolved, or, at any rate, that there is an uproar abroad as general as that event can produce. If courteous reader any of those gentlemen who now sit in parliament, should canvass us for our suffrages, let us tell them that if they voted for the present war of devastation and blood, that "existing circumstances," warrant us in previously demanding "indemnity for the past, and security for the future." Let us remind them of the intrepid integrity of ANDREW MARVEL, of HAMPDEN, and RUSSEL and SIDNEY.

The map of the heavens, at this ingress, indicates, that the scourge of war must be feverely felt in some countries, while civil discord brandishes her flaming and fatal torch, is lighting DEATH mounted on his PALE HORSE to make hideous havoc both in the east and the west; "for as the lightning cometh out of the east, and shineth even unto the west*;" not only among Europeans, but men of colour, seditions, commotions, mutinies and riots, and terrible destruction of property may be apprehended. Fiery conflagrations irradiate, and thunder rends the skies; while terrestrial agitations alarm, and sudden and calamitous vicissitudes, or conflagrations, may be expected to astonish mankind.

As the preservation, and acting of all things in the universe, according to their special nature and natural appli-

cation,

cation of one unto another, are all from the powerful and efficacious influences of Divine Providence, so there are particular operations of the spirit of God which is in all, and over all, and above all things; whether merely natural and animal, or rational and moral. The propagation of the succeeding generations of creatures, and the annual renovations of the face of the earth are ascribed unto him*. He can "smite us with blasting, and with mildew, and with hail in all the labours of our hands†, he can kill, and he can make alive, he can create, and he can destroy, He can alleviate, or altogether annul the operations of nature, but without presuming to hope for a deeper insight into the ways of providence, than that to which every sincere lover of truth may aspire, in our judgement of what is now prelagged by the configurations of the celestial bodies, we feel ourselves constrained to quote the language of the prophet: — "*Son of man prophecy, and say, Thus saith the "language of the stars," a sword is sharpened and also furbished: the sword is sharpened and it is furbished to give it into the hand of the slayer; it is sharpened to make a sore slaughter—terrors, by reason of the sword, shall be upon the people: smite therefore upon thy thigh, the sword shall be doubled the third ‡ time, for the Lord will overturn, overturn, overturn. And it shall be when they say unto thee "Wherefore sighest thou?" that thou shall answer "For the tidings," because it cometh, and every heart shall melt, and all hands shall be feeble, and every spirit shall faint, and all knees shall be weak as waters§.*"

Notwithstanding many statesmen, who are deeply infected with political fanaticism,

"To whom dream, after dream ensues,
And still they dream that they shall still succeed,
And still are disappointed,

with the perseverance of the renowned knight of La Mancha, continue bent on sallying forth in quest of new adventures; yet, by this figure of the Heavens, it seems decreed that their PATRON the GINGER-BREAD KING OF FRANCE, with his trumpery treasury of Agnus Deis, Crosses of St. Louis, and forged assignats, shall only grasp a barren scepter, "*for his molten images are falsehood, and there is no breath in them.*"

The disturbances which have taken place in Sardinia, and in our valueless kingdom of Corsica, our science warrants

us to say will not suddenly subside; those people have not the means of paying heavy imposts, and imposts will be the principal cause of Corsican discontents.

Lest any insidious JUDAS, or any mercenary emissary, unmindful of the adage, *Ne sutor Crepida*, "Let the COBLER stick to his last," should erroneously suppose, that we are inimical to legitimate kings, or their legitimate representatives, we declare, that

"We too are friends to loyalty. We love
The king who loves the law; respects his bounds,
And reigns content within them; him we serve
Freely, and with delight, who leaves us free.
But recollecting still that he is man,
We trust him not too far. King though he be,
And king in England too, he may be weak.
And vain enough to be ambitious still;
May exercise amiss his proper pow'rs,
Or covet more than freemen choose to grant;
Beyond that mark is treason. He is our's,
T'administer, to guard, t' adorn the state,
But not to warp or change it. We are his,
To serve him nobly in the common cause,
True to the death, but not to be his slaves.
Mark now the difference, ye that boast your love
Of kings, between your loyalty and ours.
We love the man;—the paltry pageant you.
We, the chief patron of the commonwealth;
You, the regardless author of its woes.
We for the sake of liberty, a king,
You chains and bondage for a tyrant's sake.
Our love is principle, and has its root
In reason, is judicious, manly, free;
Yours a blind instinct, crouches to the rod,
And licks the foot that treads it in the dust."

WEATHER, &c. THIS QUARTER.

June, 29. Thunder showers, with storms of rain or hail.
July 4, 11h. P. M. there will be a solar eclipse, invisible to us, but it will be total and central in the Meridian in long. 164 deg. 45 min west, and lat 36 deg. 45 min. north, consequently seen by the inhabitants and navigators about the islands of Sumatra, Japan, and the Sandwich islands. The beginning of this month expect copious showers; probably an engagement at sea, in which the French flag

flag will not be triumphant. 13 dry. 24, 28, wet weather.

August. This is a month of great business; it begins with seasonable harvest weather. 12, 16, 21, summer breezes, occasionally lightning or thunder. These days gave birth to the king's three eldest *hopeful* sons. It would be gratifying to curiosity, if any ingenious artist could explain the nature of the new honours that seem to await two of the royal brothers. 26, 28, 30, hot weather with showers, dangerous thunder, conflagrations, or unprosperous navigations. Mischiefs seem brewing at Paris, perhaps commotions, and cutting of throats at this time, which is fraught with trouble to the Spaniard and to some of the gentry wearing long robes.

September 5, 8. Pleasant breezes and showers of rain; unfortunate to French navigators, and we shall hear of misfortunes by accidental fires; let cabinet makers be careful of their timber yards. 14, 16, then more pleasant, but about the 19th we expect dark weather with some rain; hurricanes in the West Indies, and much blood shed and devastation among the blacks and the Germans also, if they have now any quarrel upon their hands, the latter will by the middle of the next month *once more* arrive at their *plus ultra*, i. e. the Stars fight against them, and THEY MUST RETREAT. 27, and 30, brisk winds.

OF THE AUTUMNAL QUARTER.

This season, which the Jews take for the first quarter of the year, or the season in which the world was created, always commences when the sun arrives at the first point of Libra, which it does this year, *Wednesday*, the 21st day of September, 20h. 29 min. P. M.

In a scheme of the heavens, erected for that time, we have 5 deg. of Leo on the cusp of the 10th house, and 26 deg. of Libra are upon the horoscope, a position very similar to our figure of the vernal ingress. The Sun (who, however, is in reception with Venus) is entering the twelfth house afflicted by the quartile of Saturn, located in 27 deg. 40 min. of Gemini, on the cusp of the ninth, and by the square of Mars, in 8 deg. 40 min. of Capricorn, his exaltation in the third. Venus, lady of the ascendant, is in the 14th degree of Leo, in Sextile to Mercury, who is in 21 deg. of Libra, just raising above the ascendant. Jupiter is retrograde in 5 deg. 30 min. of Pisces, upon the cusp of the fifth, beheld by a sextile aspect of Mars, and by the Moon's square from 6 deg. 40 min. of Gemini,

Gemini, whence she applies to the Sextile of Venus, the trine of Mercury, and the conjunction of Saturn. Jupiter is separating from an opposition of the new Planet, and the latter end of October will be within 5 deg. and a half of a platic trine of Saturn. This position of the heavens argues ill to the husbandman, whose hopes we fear, have suffered a destructive blight; some misunderstanding between the military order and the executive government is indicated, hence mutiny and riot may be expected. We shall hear of many robberies, and much cruelty will be practised by military marauders, but the clergy and pontifical tribe, as well as the legislative authorities are now more disposed to enter into liberal discussions concerning the rights of citizen, than heretofore.

The autumnal season is called by *Hippocrates* the mother of deadly diseases, because of the intemperature and variable constitution of the weather; and *Galen* saith it is the most pestilential and dangerous time of all the year. Mars being in Capricorn lord of the sixth, rheumatic and gouty pains of the arms, shoulders, and lower extremities, will be very prevalent. Intelligence arrives of events that are highly prejudicial to our ASIATIC Concerns.

In the course of the year,
We shall probably hear,
That a sceptre and crown,
Is tumbled down,
And on a level laid

With the more useful shuttle and the spade.

September 22, the day the Sun crosses the equinoxial line—this year is the commencement of the fifth year of the French Republic;—cold winds. October; this and the following month will be productive of various actions;—2d, 6th, showers, seasonable weather, and acceptable news for mercantile people;—12th, 18th, 20th. rain and high winds, hurricanes in the West Indies, and in some places thunder;—22d, 26th, 29th, 31st, frequent and copious showers, occasioning in many places impetuous torrents. November 1st, 3d, 14th, 25th, 29th, cold winds, with rain or snow; the latter end of this, and the middle of next month, some person will suddenly acquire a large sum of money perhaps by the lottery. Dec. 1, 3 15, 19, 27 rain, sleet or snow, with occasional high winds, and losses by fire, tedious navigations and shipwrecks; 28, 17h. 59m. PM. Sun eclipsed, to us invisible, but it will be a great eclipse precisely at noon, in the Southern Ocean, under 65 deg. 30 min. S. lat. and 91 deg. 30 min. E. lon. The beginning of this month some negotiations, or interchange of treaty takes place between England

gland and France, and we perceive that many active endeavours are now exerted to restore the peace of Europe: The scheme of the Sun's ingress at the Brumal, or Winter Quarter, shews that those who are at the head of the conspiracy against France are—PARALIZED.

Let VOLGA's sons in iron squadrons rise,
And pour in millions from her frozen skies,
Against th' oppressors of the north, where plunder'd
POLAND lies.

But thou, mild THAMES! flow thou in peaceful streams,
Bid thy rash sons restrain their martial flames;
In the blunt scabbard sheath each vengeful blade,
WAR, be thou chain'd! ye streams of blood, be stay'd:
And thou, fair PEACE! from the wild din of WAR,
Come dove-like, and thy blooming olive bear.

Reader farewell! may thou farewell, when suns and stars and worlds for ever disappear. The Sun of the writer of these ASTROLOGICAL SPECULATIONS, (in which will be found more truths than vanities) is setting in the western horizon; and he is persuaded, that it is at once his duty and his interest, to prepare with increasing diligence for his journey to that distant country, from whence "no traveller returns." But whether thou art a believer, or not, in the possibility of predicting future events, be assured that the writer has acted under the guidance of principle and conviction. When the eye that reads, and the hand that hath written these notices to a careless country, are mouldering in the dust, we should have no objection to have it recorded—

Beneath this stone
Is deposited all that was mortal
Of
A MAN,
Whose chief glory was the love of his country:
He foresaw and he foretold the war,
That commenced in the Month of February,
1793;
And exerted all the powers of his mind,
To give repeated warnings to the NATION,
Of the FOLLY, SIN, and MISERY
That would attend the interference
Of

THEIR RULERS,
To obstruct the REVOLUTION of FRANCE.

N. B. All predictions for the weather must be understood to relate to the general state of the atmosphere on the day mentioned, or 24 hours before or after that day.

London, Sept. 1795.

Gemini, whence she applies to the Sextile of Venus, the trine of Mercury, and the conjunction of Saturn. Jupiter is separating from an opposition of the new Planet, and the latter end of October will be within 5 deg. and a half of a platic trine of Saturn. This position of the heavens argues ill to the husbandman, whose hopes we fear, have suffered a destrutive blight; some misunderstanding between the military order and the executive government is indicated, hence mutiny and riot may be expected. We shall hear of many robberies, and much cruelty will be practised by military marauders, but the clergy and pontifical tribe, as well as the legislative authorities are now more disposed to enter into liberal discussions concerning the rights of citizen, than heretofore.

The autumnal season is called by *Hippocrates* the mother of deadly diseases, because of the intemperature and variable constitution of the weather; and *Galen* saith it is the most pestilential and dangerous time of all the year. Mars being in Capricorn lord of the sixth, rheumatic and gouty pains of the arms, shoulders, and lower extremities, will be very prevalent. Intelligence arrives of events that are highly prejudicial to our ASIATIC Concerns.

In the course of the year,
We shall probably hear,
That a sceptre and crown,
Is tumbled down,
And on a level laid

With the more useful shuttle and the spade.

September 22, the day the Sun crosses the equinoxial line—this year is the commencement of the fifth year of the French Republic;—cold winds. October; this and the following month will be productive of various actions;—2d, 6th, showers, seasonable weather, and acceptable news for mercantile people;—12th, 18th, 20th. rain and high winds, hurricanes in the West Indies, and in some places thunder;—22d, 26th, 29th, 31st, frequent and copious showers, occasioning in many places impetuous torrents. November 1st, 3d, 14th, 25th, 29th, cold winds, with rain or snow; the latter end of this, and the middle of next month, some person will suddenly acquire a large sum of money perhaps by the lottery. Dec. 1, 3 15, 19, 27 rain, sleet or snow, with occasional high winds, and losses by fire, tedious navigations and shipwrecks; 28, 17h. 59m. PM. Sun eclipsed, to us invisible, but it will be a great eclipse precisely at noon, in the Southern Ocean, under 65 deg. 30 min. S. lat. and 91 deg. 30 min. E. lon. The beginning of this month some negotiations, or interchange of treaty takes place between England

gland and France, and we perceive that many active endeavours are now exerted to restore the peace of Europe: The scheme of the Sun's ingress at the Brumal, or Winter Quarter, shews that those who are at the head of the conspiracy against France are—PARALIZED.

A TABLE
OF ALL
The most Common TAXES,
IN USE IN
GREAT BRITAIN.

*An Ignorance of the Law being no valid Defence, in Case of Error, this
Table ought to be carefully inspected by every Person.*

ASSESSED TAXES.

Coaches and other Carriages.

THERE shall be paid for every coach, &c. with 4 wheels, kept by any person for his own use, or to be let out to hire (except Hackney coaches) 8l. yearly, for the first;—9l. for the second;—and where more are kept, 8l. for first, and 10l. for each after the first.

And for every chaise, &c. having 2 or 3 wheels, that shall be kept by any person for his own use, or to be let out to hire, the yearly sum of 3l. 10s.

Stage Coaches are exempted from the additional duties.

Every carriage which costs under 12l. with less than four wheels, drawn by one horse, used for carrying goods in the way of trade, but occasionally for the conveyance of persons, built wholly of wood and iron, without any covering other than a titled covering, or any lining, and without springs, and which shall have the words "A taxed Cart," and also the Owner's name and place of abode, there shall be paid the yearly sum of 10s. and also 10l. per cent. thereon.

And every person assessed for such carriage shall mark, on a black ground in white letters, or on a white ground in black letters, on some conspicuous part on the outside, his name and place of abode, and the words "A TAXED CART," in Roman letters, at least one inch in length.

And if any person shall keep any carriage as aforesaid, exceeding the value of 12l. or built contrary to this act, or not so marked, he shall be liable to the duty of 3l. 10s.

But no carriage with less than four wheels, used wholly in the carriage of goods or Husbandry, shall be chargeable with the duty by reason of any person riding therein when going with any load, or for conveying the owners to and from divine service on Sundays, or for carrying persons to or from elections.

No horse drawing any cart subject to the duty of 10s. shall be liable to any duty on account of drawing any such cart.

Assessors to give notice in writing to persons keeping carriages or horses, or servants, to produce, in fourteen days after such notice, lists of the number kept by them; and persons neglecting to deliver lists to the assessor shall forfeit 10s. and doubly rated--And householders shall deliver lists of lodgers who keep carriages or horses, containing the name of such lodgers, on penalty of 10l.

Horses.

EVERY person who shall keep and use any horse for the purpose of riding, or of drawing any coach, or other carriage, in respect whereof any duty is payable, shall pay annually for such horse in the whole 15s.

Where three, four, or five are kept, in the whole 17s. 6d. for each above the first.

And where six or more are kept, in the whole 2l. for each above the first.

TAXES.

It is provided, that nothing shall charge any horse belonging to, and kept for sale and not for hire, in the stable of a licensed dealer, nor let to hire for travelling post by the mile, or from stage to stage, or let to hire for a day or less period of time, by any post master, inn-keeper or person licensed.

The duties to be paid by all persons using or hiring, *not* the person who lets them out.

Carriages let out to travel post by any person licensed to let post horses, pay only 7l.

Horse dealers, for such as they keep for riding or drawing, to pay the duty.

No person keeping a horse, &c. used really for husbandry, or drawing any carriage (except such as was heretofore liable) or carrying burdens in the course of trade, shall be chargeable with the duty, in case such horse, &c. shall not be used for any other purpose of riding, except when returning from any place to which any load or burden shall by such horse, &c. have been carried, or going to any place from whence a burden is to be carried, or being rid to procure medical assistance, or to or from market, or place of public worship, or election of members to serve in parliament, or to or from any court of justice, or to or from any meeting of commissioners of taxes.

A horse, &c. where the owners are excused the usual taxes of church and poor, are also exempted.

No person occupying a farm less than 70l. a year, and making a livelihood thereby, shall be chargeable for any horse occasionally used in riding, if such horse be really kept for husbandry.

HAWKERS, &c.

EVERY hawker, pedlar, petty chapman, and every other trading person or persons, going from town to town, or to other men's houses,

TAXES.

and travelling, either on foot, or with horses, or otherwise, in England, Wales, or the town of Berwick upon Tweed, carrying to sell, or exposing to sale, any goods, wares, or merchandizes, shall pay a duty of 4*l.* per annum.

Every person so travelling with a horse, ass, or mule, or other beast bearing or drawing burthen, the additional sum of 4*l.* yearly for each beast, over and above the former duties.

Hawkers to mark on every pack, box, bag, trunk, case, cart, wagon, or other vehicle of conveyance, every room or shop in which they shall trade, and likewise upon every hand bill or advertisement which they shall distribute, "Licensed Hawker," with the number, name, or other mark of distinction, written or printed upon the respective licenses, in large Roman capitals, under a penalty of 10*l.* for every offence. Unlicensed persons so marking their packs, &c. to forfeit 10*l.*

Hawkers selling smuggled goods, or goods fraudulently procured, either by themselves or others, with their privity or knowledge, shall forfeit their licenses, and for ever be incapable of obtaining a new license, over and above the penalties inflicted on illegal trafficking.

Nothing contained in this act, authorises any hawker, &c. to open a room or shop, and expose to sale any goods, by retail, in any town, or place, such person not being a householder there, or the same not being an usual place of his or her residence, or of his or her carrying on business, to vend or sell, whatsoever, by any mode of sale at auction, on the penalty of 50*l.* for every offence.

Every person forging or travelling with a forged or counterfeit licence shall forfeit 100*l.*

Every person lending or letting his licence to hire, and every person travelling or trading with a borrowed licence, shall forfeit 40*l.*

It shall be lawful for any person whatsoever to seize and detain any hawker, who shall be found trading without a licence, or shall refuse to produce to such person a licence according to this act.

The clause restricting hawkers from selling in market towns, except on a fair or market day, is repealed.

It shall not be lawful for any hawker to vend his wares in any place, by virtue of any licence, in case the general quarter sessions shall have made an order that hawkers shall not have liberty to vend their goods in such place, upon pain of forfeiting 10*l.*

Nothing in this act shall extend to prohibit any persons from selling any printed papers, licensed by authority, or any fish, fruits, or victuals, nor to hinder any persons who are the real workers or makers of any goods, wares, or manufactures of Great Britain, or his, her, or their children, apprentices, agents, or servants, from carrying abroad, exposing to sale, and selling, by retail or otherwise, any of the said goods, wares, or manufactures, in any mart, market, or fair, and in every city, borough, town corporate, and market town; nor any tinkers, coopers, glaziers, plumbers, harness-menders, or other persons usually trading in mending kettles, tubs, household goods, or harness whatsoever, from going about and carrying with him or them proper materials for mending the same.

Persons letting post-horses without a licence, forfeit 10l. and keeping more than one inn under one licence, 20l.

They are to paint "Licensed to let Post Horses" on the fronts of their houses, on pain of 5l.

For horse hired by the mile or stage, to be used in travelling post, there shall be charged a duty of 1½d. for every mile; and if the distance be not then ascertained, 1s. 9d. for each horse so hired.

Persons keeping a coach, &c. with 4 wheels, or any chaise, &c. with 2 wheels, employed as public stages, coaches, or carriages, shall pay annually 5s. for a licence.

Every coach, &c. with four wheels, or two wheels, employed as aforesaid, shall be charged with a duty of 1d. for every mile, paid by the owner, who must paint on the outside pannel of each door of the chaise or carriage, their Christian and surname, or forfeit 5l.

Every postmaster, &c. if he furnishes his own carriages with four wheels, or two wheels, with horses let to hire for a day, or less, for drawing on any public road, where the carriage shall have a box for driver, shall affix upon some conspicuous part of the box or seat, a brass or tin plate, on which shall be marked the Christian and surname of the owner, and name and place of abode, or forfeit, 5l.

Every postmaster, &c. who shall let horses to hire by the mile or

TAXES.

Stage, to be used in travelling post, shall, previous to the using such horse, ask, and receive of persons hiring the same, one penny halfpenny per mile for each mile such horse shall be so hired to travel, and shall, at the same time he receives duty, deliver to the person hiring horse, one or more of said stamp-office tickets, and to which postmaster, &c. shall add name of his sign or house; and shall also insert name of place where such licenced person resides, and to which such horses may be hired to go; and if any person neglect to ask and receive the said duty of one penny halfpenny per mile from person hiring horse, or neglect, or refuse to deliver tickets filled up to such person to hiring horses, he shall forfeit 10l.

No traveller shall be compelled to pay for a greater number of miles than expressed upon the ticket issued to such traveller; and if any person so licenced shall insert in any such ticket name of any other place than to which the horses shall be hired to go, or shall fill up a less number of miles than the number charged to such traveller, every offender shall forfeit 10l. and licence may be refused him in future.

If any person shall take off the brass or tin plate to evade duty or payment of the 1s. 9d. for each horse at the turnpike, he shall forfeit 10l.—And in case any carriage shall pass without having such brass or tin-plate affixed thereon, driver shall forfeit 40s.

Every postmaster, &c. so licenced, who shall be guilty of wilful concealment, or making false accounts, or other fraudulent contrivance, device, or pretence whatsoever, with an intent to defraud, he shall forfeit 50l. and said commissioners may refuse to grant him licence in future.

In order to prevent the evading the payment of duties upon horses hired by the mile or stage, under pretence of such horses being let to hire for a day or less period of time, no person at whose inn, house, or place kept for letting horses to hire, traveller shall change horses, shall let to hire any horse to traveller otherwise than by the mile or stage; and if any post-master, &c. shall act contrary hereto by issuing day-tickets to persons travelling post, he shall forfeit 10l.

If toll-gate keeper shall wilfully neglect to ask, or refuse to receive tickets, or shall neglect or refuse to file the same when delivered, shall forfeit 5l.

Every horse hired by the mile or stage, shall be deemed to be hired to travel post, within this act, although the person hiring the same, do not go or travel several stages upon a post-road, or change horses; and although at the stage or place, at, or to which such horses shall be hired, there shall not be any post-house, and although there shall not be any post established on the road upon which such horses shall be hired to go.

Stage Coaches, Diligences, &c.

If any person who shall keep any carriage with four wheels or two wheels, to be employed as public stage coaches or carriages, for conveying passengers for hire, shall let out the same, without having first obtained a licence, shall forfeit, for every time such coach, diligence, or other carriage, shall be used, 10l.

No person so licenced, shall, by virtue of one licence, keep more than one coach or carriage, on penalty of 10l.

Every person licenced to use any coach, diligence, or carriages, to be employed as public stage-coaches, shall pay 1d. for every mile every such coach or other carriage shall be so used to travel.
